

Making Math Fun and Relevant for Your Child

Math can be a part of your child's everyday life, no matter their age!

- **Young children:** Count ingredients while cooking, measure objects around the house, or compare prices at the store.
- **Older students:** Work on a budget together, calculate savings interest, or discuss statistics in the news.

These activities help build math skills and show how math is used in the real world, making it more meaningful and engaging.

Image of the Week

Spark curiosity and conversation! Sign up to receive the Image of the Week and discuss it with your child. What do they notice? What questions do they have?

Are there more orange squares or green squares?

How many do you see?

Hands-On Learning = Math Success!

Using objects and pictures helps kids understand tricky math ideas. This makes learning fun and builds a strong math foundation!
