

COMMITTEE OF THE WHOLE

10 May 2022

Report No. 22-037

Vimy Ridge Public School – Interim Accommodation Measures

**Key Contact: Michael Carson, Chief Financial Officer, 613-596-8211
ext. 8881**

PURPOSE:

1. To obtain Board approval of a plan to manage accommodation pressures at Vimy Ridge Public School (PS) by approving the direction of all new elementary students new to the Findlay Creek area by directing them to Robert Bateman Public School (PS) (K-6) or Roberta Bondar Public School (PS) (7-8).

CONTEXT:

2. Findlay Creek is a rapidly developing community which will contain over 7,000 homes at full build out. During the community development plan process with the City of Ottawa, the Board had originally identified the need for two elementary schools to serve the accommodation needs of this future community.

As of the end of 2020, approximately 5,185 of the homes have been built. During 2020, a near decade high number of homes were built (680) likely accelerating enrolment growth and accommodation pressures at Vimy Ridge PS.

Vimy Ridge PS opened in 2017 as the first of the two planned Ottawa-Carleton District School Board (OCDSB) elementary schools for the community. It remains the only public elementary school within the Findlay Creek community serving local students. The school which has a capacity of 674 pupil places, offers a kindergarten to grade 8 English with core French and early French Immersion program.

With ongoing growth in the community over the next few years, enrolment growth is no longer sustainable at the school.

The need for a second 674 pupil place elementary school within the Findlay Creek Community was first identified as a capital priority in 2018. In September 2019 and again in May 2021 and finally on 25 February 2022 the Board submitted a capital priority funding business case to the Ministry of Education for the construction of the new school. An announcement was made that the funding for the school has been granted on 22 April 2022.

Supporting earlier business case requests by the Ministry of Education for capital priority funding for this new elementary school, the Board acquired the school site in October 2021. The 2.55 ha (6.3 acre) site is located at 4501 Kelly Farm Drive, at the southeast intersection of Kelly Farm Drive and Miikana Road. Please refer to the general location map attached as Appendix A.

On 29 October 2021, the enrolment at Vimy Ridge PS was 1,081 students including 1,023 in-school students and 58 Ottawa-Carleton Virtual School (OCV) students. This enrolment requires the use of 17 portables on site for instructional purposes.

The enrolment is projected to increase to 1,219 (181% UF) for 2022-2023 and 1,370 (203% UF) for 2023-2024 resulting in the need for 24 and 28 portables for instruction respectively. Going beyond 21 portables would most likely result in the loss of the use of the outdoor basketball court. (See Appendix B Status Quo)

KEY CONSIDERATIONS:

3. Even though the second school in Findlay Creek has been funded, it takes almost 2 years given current timelines to construct a school and growth in enrolment is not sustainable at the school over this timeframe. An interim accommodation measure is still required.

As such, Board approved a consultation plan outlined in Report 21-097 which took place earlier this year.

4. The Consultation

Over the course of this winter/spring, a working group met 3 times and a broader public consultation was held

<https://ocdsb.ca/cms/one.aspx?portalId=55478&pageId=37903663>

The working group was made up of school council representatives and administrators of the schools involved and additionally we had community representatives from both Findlay Creek and Riverside South. Area trustees were very involved in the ongoing discussion.

Originally, the staff-presented option was discussed: Moving the intermediate program (grades 7 and 8) in a phased manner to Steve MacLean PS. As a result of ongoing discussions, another option was brought forward: that all students who are new to the Findlay Creek area (i.e., moving into the neighborhood for the first time as of a certain date) be directed to either Robert Bateman PS or Roberta Bondar PS, according to their grade assignment.

5. The Options Considered

The first option considered was as follows:

Redirect the Vimy Ridge PS grade 7 – 8 attendance boundary area to Steve MacLean PS on a phased basis commencing with grade 7 for September 2022 and grade 8 in September 2023.

- For 2022-2023, the grade structure at Vimy Ridge PS would be revised to kindergarten to grade 6 and grade 8.
- Current (2021-2022) grade 7 Vimy Ridge PS students would remain at Vimy Ridge PS to complete grade 8.
- For 2023-2024, the grade structure at Vimy Ridge PS be revised to Kindergarten to grade 6.

Growing enrolment pressures would be significantly reduced by temporarily redirecting the grade 7 and 8 students to Steve MacLean PS. It would result in lowering the enrolment at Vimy Ridge PS by approximately one hundred students the first year to 1113 students (165% UF) and another hundred the second year to 1153 (171%UF) (see Appendix C).

It would also lower the estimated number of portables required on site over the next two years from 24 and 28 to 20 and 21 respectively.

With the addition of grade 7 students from Vimy Ridge PS in 2022-2023 and both grade 7 and 8 students in 2023-2024, the enrolment at Steve MacLean PS would increase from 853 students (108% UF) to 961 (122% UF) the first year and from 828 (105% UF) to 1046 (133% UF) the second year.

During the interim measures, the school would most likely require 9 portables on site the first year and 12 the second year. Going beyond 9 portables at Steve MacLean PS would result in the loss of the use of the sports field. The OCDSB has a joint use agreement in place with the City of Ottawa for the sports field. The agreement may need to be suspended while the interim measures are in place.

Ultimately, the alleviation of enrolment pressures in this part of the district would be realized with either the opening of a second elementary school in the Findlay Creek community and/or with the opening of a new Riverside South secondary school (Gr 7-12) which is now scheduled for a September 2024 opening. The attendance boundaries, program offerings and opening grade structures for these new schools would be subject to a broader public consultation process.

The second interim accommodation measure discussed is as follows:

Select a specific date, and pressure would be alleviated from Vimy Ridge PS by directing all students moving into the growing community to nearby Robert Bateman PS for grades K-6 and to Roberta Bondar PS for grades 7-8.

Although the alleviation of pressure is not as dramatic as the first solution discussed, it is steady and manages pressures until a new school can be built.

Both Robert Bateman PS and Roberta Bondar PS have room to accept new students. Robert Bateman PS with significant available instructional space; Roberta Bondar PS is nicely full but with acceptable room (which is the reason that it was determined that if such a redirection was to take place, the population

should be split between Bateman (K-6) and Bondar (7-8) as in theory, Roberta Bondar PS has the grades and programs to accept all students but not the available space. By splitting enrolment over 2 schools the impact on one school is particular is lessened.

It was discussed that some families who had moved into Findlay Creek some time ago, or families who had younger siblings of students already at Vimy Ridge PS would have a desire to be grand parented to attend Vimy Ridge PS. Additionally, though uncommon, a family may decide to move within the community. These situations are discussed more thoroughly later in this report.

While the alleviation of pressure is not as dramatic as the grade 7-8 option moving to Steve MacLean PS, the projected enrolment is discussed in Appendix D to this report.

6. Results of the Consultation

The first result that emerged early in the working group discussions was that Vimy Ridge PS could manage, even with growing enrolment, for the 2022-23 school year with the use of portables.

The option of sending the Grade 7-8 to Steve MacLean PS in a phased manner was met with concern from both the Vimy Ridge PS and Steve MacLean PS communities.

Steve MacLean PS is just coming out of an era of itself being overcrowded and the school remains over enrolled. Moving the grade 7-8 students from Findlay Creek into the school would not crowd it to previous levels, but it certainly would not see the return to a balanced enrolment in the manner it is now experiencing. The move of the Intermediate students would also break up families at Vimy Ridge PS.

Other disincentives to this option are that, in order to attempt to manage busing, a time change would be required to the Steve MacLean PS bell time which is not desired. There is an existing neighborhood in Riverside South that is not directed to Steve MacLean PS, rather Farley Mowat PS across the Rideau River in Barrhaven and there is a desire to have that community “repatriated” into Riverside South before another community takes that “space” at Steve MacLean PS.

Finally, if staff were to move the grade 7-8s from Findlay Creek to Steve MacLean PS, there would likely be a desire to move onto high school with their new friends and classmates at the newly constructed Riverside South High School. Currently, Findlay Creek students are directed to Ridgemont High School. For as long as the interim measure were to be in place (and presumably there may be a sibling option in place) it would be expected that this group of redirected students be permitted to be redirected to the new high school.

The more positive aspect of this particular interim measure is that, administratively, it is straightforward to phase in (and to phase out).

It involves a predictable number of students at predictable grade levels, which means resourcing and management are more straightforward.

However, over the course of the discussion with the working group, it was clear that other options were desired. Any number of ideas were floated from capping of enrolments to setting up a temporary school made up of temporary accommodation at the Findlay Creek #2 Elementary School site.

Staff suggested an alternative may be to redirect any new students new to the Findlay Creek community as of a certain date to Robert Bateman PS for K-6, and flowing to Roberta Bondar PS for 7-8 Staff have proposed a date of January 1st, 2023 as that date.

The benefit of this option is that existing students and residents are not disrupted. Those moving into the neighborhood would be planning for their children to make a school move anyhow; but under this proposal, the move would not be to a school located in Findlay Creek directly.

A number of families (at least anecdotally from in year grand parenting) move to the Findlay Creek community from Ottawa South. Robert Bateman PS and Roberta Bondar PSs are located straight up Bank Street from Findlay Creek, so the route is familiar and manageable for many families.

The disincentives to this solution are mainly concerns of the Board, not the students impacted so that is something to take into consideration: Busing would be involved at a critical time in the availability of school transportation, but this is no different than the Steve MacLean PS option (and a bell time change is not triggered to accommodate this). The solution itself involves moving children for what staff presume is a longer period of time and knowing where one goes to school is going to be less transparent than just plugging an address into school locator.

While there may have to be limitations to grand parenting (discussed later) there may be longer term phasing in and out of this solution. For example, a child moving into the community in Year 1 kindergarten may be directed to Robert Bateman PS. When a new school is constructed in Findlay Creek, there may be a desire to be grand parented at a school they know and to which they have established connections. This grand parenting may then be required for 8 years (taking them to the end of Grade 6) or beyond if they are permitted to move onto Roberta Bondar PS for 7-8.

However, staff does anticipate that, when a new school is constructed in Findlay Creek, the Ministry of Education will expect a minimum school population to be established. In dividing up Findlay Creek, this will likely mean a block move-of some students currently accommodated at Vimy Ridge Public School (if they find themselves in the new school's catchment) and a corresponding block move back of some of the students who find themselves redirected by means of this report to Robert Bateman PS and potentially Roberta Bondar PS.

It is possible that those students redirected to Robert Bateman PS and Roberta Bondar PSs who find their addresses in the to-be-amended Vimy Ridge PS boundary, would be permitted to be grand parented at Robert Bateman PS and Roberta Bondar PSs should they so wish. All of this will be subject to more extensive consultation in the public boundary setting exercise for the new elementary school.

Finally, it was discussed that some families had moved into Findlay Creek some time ago to start or raise their too-young-for-school children and as they reached school age, should be grand parented to attend Vimy Ridge PS. This would also hold true for younger siblings of existing Vimy Ridge PS students. There is also the uncommon situation where people will move from one house to another within the Vimy Ridge catchment. It is our intention to grandparent those students as well.

CONCLUSION

The results of the consultation were, as usual, mixed. However, the greatest number of respondents indicated that the Robert Bateman PS/Roberta Bondar PS option was preferred. There are times that regardless of popularity, such a solution cannot be recommended. Despite the complexity of “untangling “what is supposed to be an interim solution, staff is supportive of the Robert Bateman PS/Roberta Bondar PS redirection.

7. Formal Pupil Accommodation Review (PAR) Not Required

A formal PAR under Board Policy P.118PLG, Pupil Accommodation Reviews (currently suspended under a provincial moratorium) is not required, as the interim measure will not move more than 50% of Vimy Ridge PS’s enrolment.

The policy states that a PAR is not required when the Board is planning the relocation of grades and programs in which the enrolment constitutes less than 50% of a school’s enrolment. The calculation is based on the enrolment at the time of the relocation.

RESOURCE IMPLICATIONS:

8. The cost of implementing the interim solution will be managed within existing departmental budgets. There will be additional transportation costs to the Ottawa Student Transportation Authority and additional resources required to an already-stressed system.

STRATEGIC LINKS:

9. Conducting a review of pupil accommodation in this part of the district in order to provide students with improved access to learning environments, serves to optimize the use of District resources which is consistent with the culture of caring objective of the 2019-2023 Strategic Plan.

RECOMMENDATION:

- A. THAT commencing on 1 January 2023 and thereafter until new boundaries can be established for Findlay Creek #2 Elementary School, students moving into the Vimy Ridge PS attendance boundary on or after the date established (by means of a executed deed or rental agreement) will be directed to Robert Bateman PS for grades K-6, and will feed to Roberta Bondar PS for grades 7-8.

- B. THAT younger siblings of existing Vimy Ridge PS students, or students who can demonstrate they moved into the Findlay Creek community before 1 January 2023 or for those who moved within Findlay Creek at any time but can establish residency in the community prior to 1 January 2023, attend Vimy Ridge PS until the boundaries for said school may be amended.
